TECHART for the Porsche 911 models.

Essen, November 25th, 2016

TECHART sharpens the character of the current Porsche 911 model generation with a versatile range of individualization options. Such as the TECHART Aerokits for the 911 models. And also in terms of performance and driving dynamics, lightweight wheels and the unsurpassed repertoire of TECHART's interior refinement options, TECHART provides a new level of individuality to all 911 drivers.

Ideal, redefined. TECHART Aerokits for the Porsche 911 models.

The TECHART aerodynamic bodykits underline the sport-focused character of the 911's driver. The design embodies technical and functional quality, as well as a classy treatment of the vehicle's characteristics shape. Made of premium materials such as carbon fiber and polyurethane RIM, all parts are distinguished by trouble-free installation, perfect technical compatibility, high load bearing capacity and dimensional stability, combined with a low weight.

The two-piece Front Spoiler I features an integrated splitter and integrates seamlessly with the front apron. For the 911 Carrera models, customers can choose among two different TECHART rear wings. The Rear Wing I is mounted directly on the rear lid and is therefore adjusted automatically. The new Rear Wing II is fixed and replaces the automatically adjustable rear lid. Wind-tunnel developed air intakes ensure optimum airflow to the charge-air coolers. At the same time, TECHART's newly shaped rear air outlets provide improved heat dissipation.

The TECHART roof spoiler, the more defined contours of the side skirts and rear diffusers make the new TECHART Aerokits for the 911 models complete.

Sport, internalized. TECHART Carbon Fiber Packages for the 911.

High-grade TECHART carbon fiber parts highlight the individual orientation with new styling elements in spotlessly processed carbon. The lightweight material is shaped and finished in skilled manual work. The results are carbon parts which enable many personalization opportunities such as matt or high-gloss finishes or even color matched carbon highlights.

TECHART for the Porsche 911 models.

Manufactured at TECHART's inhouse carbon fiber shop, genuine TECHART carbon parts add sport-oriented traits to both, TECHART body parts such as air intakes or wing profiles, as well as TECHART interior trims and complete seat backpanels. For a perfect match, it is even possible to upgrade OE parts of the 911 models with TECHART carbon fiber such as the Porsche SportDesign mirror. TECHART Carbon Fiber Packages are available for any 911 model.

Driving dynamics, tailor-made.

TECHART Powerkits for the 911 models.

Breathtaking design and sophisticated technology are an inherent part of all TECHART programs. New TECHART performance options set the 911 models apart from the series models. – As always, backed by the TECHART TECHTRONIC warranty and the security of genuine TECHART OE quality.

With the new TECHART powerkit for the 911 Carrera, 430 hp and 530 Nm are at the driver's command (series: 370 hp, 450 Nm). The power enhancement for the 911 Carrera S provides a power boost of additional 60 horsepower which makes a total of 480 hp and 580 Nm (series: 420 hp, 500 Nm). Both powerkits feature the reliable TECHART TECHTRONIC engine management.

Technical Data

TECHART for the Porsche 911 models.

TECHART sport exhaust with four central tailpipes for the 911 Carrera models:

The TECHART performance options raise the heartbeat of all 911 owners. Such as the sport exhaust systems for sporty and unique soundscapes. The exhausts feature dynamic valve control for audible driving pleasure whenever you're in the mood.

For the 911 Carrera models, the TECHART exhaust system »Racing« presents a completely new look and feel. Four central titanium tailpipes with carbon fiber tips give an unmistakable statement. Besides its unique styling, the four-tailpipes design allows a maximum sound difference between closed and opened exhaust valves.

Lift system retrofit: TECHART Noselift®.

For a sporty appearance even at standstill, TECHART spacers and sport springs are the right choice. The springs can be combined with Porsche's optional lift system. All 911 which missed this feature can be retrofitted with TECHART's Noselift® front axle lift system. This provides additional every day use suitability through additional ground clearance at the push of a button. Ride height adjustment at the front axle: 60 mm (Porsche lift system: approx. 40 mm), automatic lowering at 50 km/h (Porsche: approx. 35 km/h).

Personality, 360 degrees: TECHART wheels in 20- and 21-inch size.

Genuine TECHART wheels are distinctive design which perfectly complements the new 911 models. Designed and engineered by TECHART in Germany, following the renowned quality standards of the brand.

For the 911 range, the TECHART Formula IV wheels and the TECHART Formula IV Race centerlock wheels offer brilliant styling and freedom for further individualization: with a pinstripe matching the color of the brake callipers, color-coordinated with the interior trims and stitching, bi-color or multi color painted or with a sporty matt finish.

»Exclusive« means »Yours«. The full TECHART repertoire creates a truly unique 911.

The in-house saddlery transfers the individual preferences of its owner to the interior design of the 911 models, manufactured by TECHART in unsurpassed craftsmanship.

The illuminated TECHART aluminium door entry guards give an eye-catching welcome. Besides full individual treatment of the interior, TECHART assists its customers in setting selective highlights such as any kind of leather refinement and upholstery, decorative stitchings, carbon made or lacquered seat backpanels, in-house produced carbon trims and lacquered surfaces or color-matched instrument dials.

TECHART steering wheel: TECHART »Type 7«, smaller in diameter and optionally heated.

The TECHART »Type 7« sport steering wheel uses the 911's optional Porsche GT Sport steering wheel as its basis. From the raw steering wheel rim, TECHART's master craftsmen then give it its typical ergonomic shape, padding and finish it with finest leather, lacquered trims, carbon fiber segment, Alcantara, leather piping and any other TECHART options the customers may choose to individualize their steering wheel, before it is finally sewed by hand.

Any functionality of the original steering wheel is maintained such as multifunction, paddle shifters as well as the optional Mode selector. All TECHART steering wheels based on a heated series steering wheel are now available with an optional heating, so this comfort feature can be maintained even though the steering wheel is fully individualized. The paddle shifters integrate seamlessly with the personalized character of the steering wheel and interior, if the customer decides for TECHART's new paddle trims, made of fine leather or Alcantara.
