GT Street R
TOURING

GT Street R TOURING

TECHART introduces the GTstreet R Touring. A limited edition masterpiece for performance enthusiasts based on the Porsche 911 Turbo S. The custom-built super sports car follows the iconic TECHART GTstreet DNA with only 25 exclusive units of the GTstreet R Touring to be crafted.

With a legacy spanning over two decades, TECHART's signature customization concept GTstreet has gained worldwide recognition for its unrivaled symbiosis of two worlds: true everyday use suitability and uncompromising track performance.

Spectacular carbon fiber lightweight components define the characteristic and exciting exterior styling of the TECHART GTstreet R Touring aerokit.

A standout highlight of the GTstreet R Touring is the newly introduced fixed rear spoiler. Timeless, racing-inspired styling. Increased down force in every driving mode and well-balanced aerodynamics at all speeds.

Entirely made of carbon fiber, it is significantly lighter than the standard rear spoiler

Powered by up to 589 kW (800 hp) and 950 Newton meters of exhilarating TECHART performance, the GTstreet R Touring delivers an unmatched driving experience, offering enthusiasts a symphony of power and custom-made driving pleasure.

A close-up photograph of a car's interior, focusing on the center console and gear shift area. The image shows a black leather gear shift knob with a silver-colored trim ring. The surrounding area is covered in a dark, textured material, possibly carbon fiber or a similar composite material. The center console is upholstered in a light brown leather. The gear shift knob has a silver-colored trim ring with the numbers '2' and '3' visible. The word 'Interior.' is overlaid in the center of the image.
