TECHART GrandGT performance and styling for the Porsche Panamera.

An athletic appearance, increased performance and maximum individuality in the interior. TECHART leaves nothing to be desired with the GrandGT refinement program.

With the TECHART GrandGT customization options, the Leonberg-based premium refinement company presents a workout program for the Porsche Panamera models, increasing performance by 90 hp and 130 Newton meters for the Porsche Panamera Turbo S. The TECHART Powerkit delivers an impressive new total output of 720 hp and 950 Newton meters.

A powerful design and an 80 mm wider track width characterize the athletic look of the GrandGT exterior styling. With the thrilling TECHART Aerokit, the design of the Panamera models is significantly sharpened compared to the production vehicles. With the wheel designs Formula VI, Formula V and Daytona II, Panamera enthusiasts can choose from three spectacular 22-inch TECHART forged wheels.

In the interior, the TECHART Saddlery refines the Panamera models individually according to customer requirements, in a highly luxurious or sporty trim - from the headliner to the footwell.

Powerful TECHART GrandGT exterior styling.

Dynamic shaped wheel arch extensions and a distinctive front apron with an integrated splitter dominate the impressive front view. The aerodynamic Front Spoiler II with larger air intakes optimizes the airflow to the intercoolers and increases the cooling of the braking system.

The TECHART Aero Engine Lid – entirely made of carbon fiber – delivers pure sportiness. Two prominent lines and an indicated powerdome with a central air outlet further emphasize the energetic GrandGT look.

PRESS INFORMATION

The masculine side view underlines the characteristic GrandGT design line with the integrated wheel arch extensions. The increased vehicle width by 50 mm at the front and 80 mm at the rear further strengthens the athletic appearance of the GrandGT.

At the rear, impressive air outlets behind the wheel arch extensions as well as a diffuser with four distinctive fins and titanium double-tailpipes with carbon fiber covers top off the powerful look. The TECHART Rear Spoiler II for the sedan models finishes the GrandGT exterior styling with a wing profile in visible carbon fiber or painted in body color.

Power boost of up to additional 90 hp for the Panamera models.

TECHART offers impressive performance gains for the Panamera Turbo S. The core of the power boost is the intelligent TECHART TECHTRONIC engine management system. The significant performance increase of 66 kW (90 hp) and 130 Newton meters is unleashed at the push of the Sport mode button.

Technical specification of the TECHART Powerkit:

TA 071FL/T1.1 Powerkit	
for	Panamera Turbo S (4,0 l/630 hp/820 Nm)
Power Enhancement	+66 kW (+90 hp)
Torque Increase	+130 Nm
Total Power Output	529 kW (720 hp)/max. 950 Nm
consisting of	TECHART TECHTRONIC
Acceleration (with Sport Chrono Package)	
0-100 km/h	3.0 s
0-160 km/h	6.8 s
0-200 km/h	10.5 s
100-200 km/h	7.4 s
Top Track Speed	315 km/h

The installation of the TECHART Powerkit is easy and quick and can be done by every authorized TECHART sales partner worldwide without touching the standard engine management software.

PRESS INFORMATION

Less weight, more style: three iconic wheel designs for the GrandGT.

In conjunction with the GrandGT Aerokit, the Panamera can be equipped with three stunning TECHART light alloy wheel designs.

With slender spokes, low weight, appealing dimensions and particular sport-oriented styling, the 22-inch forged aluminum wheel Formula VI differentiates the Panamera from the production model. The tire dimensions are 285/35 ZR 21 at the front and 335/30 ZR 21 at the rear, providing both, sporty design and maximum grip as well as improved handling. The unmistakable 22-inch TECHART Formula V multi spoke wheel translates into an exceptionally sporty rim with 20 fine spokes creating a unique turbine-like look. The new TECHART Daytona II reinterprets a classic TECHART wheel design of the past in 22-inch and is an evolution of this design, engineered in modern forging technology.

Like every TECHART wheel, a number of options for further personalization is available in order to make it a perfect match. These include single and multi color paint finishes, an optional gloss turned front surface and, if desired, decorative accents in individually selectable colors. The brake calipers can be individualized with a high temperature resistant coating in custom color, too.

Sportiness and maximum individualization in the refined interior.

The TECHART saddlery offers limitless individualization options for the Panamera interior. The handcrafted interior can be enhanced with high-quality materials and special accents to any desired extent. This encompasses a sporty mix of perforated leather and Alcantara®.

A highlight feature is the meticulous stamped perforation in honeycomb structure as well as the in contrasting color underlaid leather, creating a one-of-a-kind glimmering effect under different incidence of light. Furthermore, the TECHART manufactory provides an endless variety of designs and layouts of customized perforated leather structures.

Leather piping in contrasting color refines seats as well as floor and trunk mats. The mix of Alcantara® and leather in the handcrafted seat trim and backrests in leather emphasize the modern character of the TECHART program for the Panamera models compared to the series. The iconic TECHART

logotype is embossed on the door trim and floor mats and in addition to that, embroidered on the front and rear seats in matching colors.

TECHART is well-known for the individualization of steering wheels. Refinement options, such as a personalized driving mode switch, screws in contrasting color, painted surfaces, leather and Alcantara® segments as well as carbon fiber trims, matching pipings, stitchings and perforations create a vast variety of options. Naturally, standard features such as multifunction, paddle shifts or steering wheel heating are maintained.
