## **New TECHART GTstreet R Cabriolet with up to 800 hp.**

**Premiere for the open top super sports car: the TECHART GTstreet R Cabriolet based on the Porsche 911 Turbo and 911 Turbo S Cabriolet. Since 20 years, the signature customization concept GTstreet R unifies extremes: true everyday driveability and racetrack performance.**

After TECHART's introduction of the TECHART GTstreet R in June, TECHART now presents the popular open top variant TECHART GTstreet R Cabriolet. Collectively, the GTstreet R coupe and cabriolet variants are limited to 87 units. In addition to the GTstreet R program - consisting of an aerodynamic package, TECHART sports exhaust system and TECHART Formula VI forged wheels - additional performance and interior upgrades are available for the 911 Turbo and 911 Turbo S Cabriolet models. All components are developed and manufactured according to the high quality requirements by TECHART - "engineered in Germany". The GTstreet R Cabriolet kit is available from EUR 63,000 plus VAT and can be ordered as of now.

### **TECHART power-up for the 911 Turbo Cabriolet models.**

Spectacular carbon fiber lightweight components with improved aerodynamics characterize the iconic exterior of the TECHART GTstreet R Cabriolet. An athletic aerokit with front apron, carbon fiber aero hood, lightweight fenders in conjunction with wheel arch extensions, side skirts, rear apron and carbon rear wing, carries the typical GTstreet character to the outside. Large air inlets ensure an optimized air flow to the intercoolers.

With two power upgrades the TECHART GTstreet R Cabriolet is keeping its promise of delivering unrivaled track performance. The TECHART powerkit TA092/T1.1 with the TECHTRONIC management boosts the 911 Turbo S Cabriolet with an additional 44 kW (60 hp) and generates a total output of 522 kW (710 hp) at the push of a button. The maximum torque increases by an additional 100 Newton meters and thus a total torque of 900 Newton meters.

## PRESS INFORMATION

---

New and improved turbochargers in connection with refined software for the engine management and the transmission control unit trim the Porsche 911 Turbo S Cabriolet to maximum performance with the most impressive TECHART power upgrade TA092/T2.1 to date - up to 588 kW (800 hp), 950 Newton meters of torque and a top speed of 350 km/h.

The vehicle level can be lowered by 25 mm with the TECHART sport spring set and guarantees a sportier driving experience compared to the standard 911 Turbo Cabriolet, while the new coilover kit enables a lowering in the range from 5 mm to 30 mm.

### **Tailor-made open top sports car for performance enthusiasts.**

The unique and emotional soundscape of the hand-welded sports exhaust system can be best enjoyed in the TECHART GTstreet R Cabriolet. The valve control - with a wide range of acoustics between the open and closed valve setting – makes the super sports car cabriolet the ideal companion every day and on the racetrack.

The dimensions of the wheels and tires have grown with the GTstreet R aerokit and promise better handling with a track that is 30 mm wider on the front axle. The TECHART Formula VI forged wheel is available in 20- and 21-inch with a central lock as well as in its own variant with and without aero discs.

With a high-quality mix of Alcantara®, leather, heritage fabrics and individual carbon fiber packages, the TECHART interior manufactory leaves no customer wish to be desired – down to the last seam. A handcrafted TECHART sports steering wheel and exclusive details complete the GTstreet R Cabriolet interior.

The seemingly endless selection of personalization options can now be experienced in the TECHART 3D configurator: <https://configurator.techart.de>.
