PRESS INFORMATION

TECHART unveils GTstreet R Touring.

The new GTstreet R Touring is a limited edition masterpiece for performance enthusiasts based on the Porsche 911 Turbo S. TECHART's custom-built sportscar conversion is an evolution of the iconic GTstreet R customization range, with only 25 units to be built.

Leonberg/Germany, March 8th, 2024 – With a legacy spanning over two decades, the TECHART GTstreet range epitomizes TECHART's relentless pursuit of automotive perfection. Limited to a prestigious 25 units worldwide, the new conversion GTstreet R Touring seamlessly marries everyday practicality with uncompromised driving performance – a hallmark of TECHART's signature customization philosophy since the inaugural GTstreet range debut in 2001.

Extensive GTstreet R Touring Aerokit features new ducktail style rear wing.

Lightweight TECHART carbon fiber components do not only make outstanding aerodynamics but also define the exciting exterior styling of the TECHART GTstreet R Touring. More than 40 different exterior parts compose the sophisticated aerodynamic bodykit. It features a customizable complete front and rear apron with visible carbon fiber elements, a carbon fiber aero hood, lightweight carbon fenders with integrated air outlets, carbon wheel arch extensions, side skirts, carbon fiber side air intakes and more. All exposed carbon parts can be ordered in high gloss or matt finish.

A standout design highlight of the GTstreet R Touring is the all new lightweight rear spoiler. Its design line is timeless, classy and racing inspired. Entirely made of carbon fiber, it provides increased downforce and balanced aerodynamics at high speeds. Comprising a paintable carbon fiber base frame, a carbon spoiler lip as well as lightweight construction structural parts, TECHART's new rear spoiler is 60% lighter than the 911 Turbo's stock rear wing. The distinctive spoiler lip offers further personalization options, available in visible carbon fiber finish or painted in a color of choice. With new integrated air ducts, the GTstreet R Touring rear spoiler also provides improved cooling air supply to the power enhanced engine.

PRESS INFORMATION

Two TECHART powerkit options up to 800 horsepower and 950 Newton meters.

The GTstreet R Touring comes with TECHART's engine powerkit TA092/T1.1, adding 44 kW (60 hp) to the 911 Turbo S, achieving a total of 522 kW (710 hp). The maximum torque increases by an additional 100 Newton meters reaching a new max. torque of 900 Newton meters.

As an option, the GTstreet R Touring can be ordered with the brand's most powerful upgrade to date: the TA092/T2.1 engine upgrade provides 110 kW (150 hp) of additional power and adds 150 Newtonmeters. The kit features improved turbochargers, new engine management software as well as an optimized gearbox management. The result: a staggering 589 kW (800 hp) and 950 Newton meters of torque. 0-100 km/h: 2.5 seconds. Top speed: 350 km/h.

The GTstreet R Touring's sports exhaust system is a hand welded masterpiece for true performance enthusiasts and delivers an unmistakable immersive soundtrack. The valve control offers a wide acoustic range and ensures an exhilarating experience on both daily drives and racetracks.

Enhanced driving dynamics, finely set up for a personal Grand Tour.

The GTstreet R Touring enables a significantly better handling with its 30 mm wider track at the front axle compared to the base car. It comes with lightweight 20-/21-inch TECHART Formula VI forged centerlock wheels, optionally featuring TECHART carbon fiber aero discs.

For a sportier driving experience, TECHART sport springs lower the vehicle by 25 mm. Alternatively, a TECHART coilover kit allows an adjustable lowering range from 5 mm to 30 mm, catering to individual preferences. For additional ground clearance at the push of a button, the rapidly adjusting TECHART Noselift front axle lift system is available as an option.
